- Copy data from 'Transit Routes' dataset under columns 'geom' and similarly paste under 'geom' column of 'Presubmission Community Meetings' in front of the FIDs from 'Transit Routes'.

- Copy the 'Route' column values of 'Transit Routes' dataset and paste in front of the values for 'Transit Routes' data in the 'Presubmission Community Meetings' dataset. Paste corresponding column name in the headers section (Top of the sheet).

5. Remove extra columns which would not be required in the analysis.
